Content

Preface	iii - iv
Stanisława Kluska-Nawarecka, Edward Nawarecki, Henryk Polcik, Teresa Wójcik: Information-decision system aiding scientists and engineers	1 - 10
Wolfgang Kienreich, Michael Granitzer, Vedran Sabol, Werner Klieber, Mattias Lux, Walter Sarka: Visual Analysis of Search Results Obtained from Very Large Newspaper Article Repository	11 - 17
Christopher N. Carlson: Generalization and Uncertainty in Information Extraction	18 - 30
Gabriella Salzano: Modeling Metadata for Multidomain Health and Geography Information	31 - 42
Hansjörg Kutterer: A more comprehensive modeling and assessment of geo-data uncertainty	43 - 56
Nada Vučetić, Nedjeljko Frančula, Svetozar Petrović: Cartographic Generalization of Line Elements based on Maximum Correlation	57 - 73
H. Hagen, Maja Ruby, Inga Scheler: Information Clustering in the context of Urban Planning	74 - 82
Felicia O. Akinyemi: Modelling Poverty Reduction from a System Perspective	83 - 95
Peter Tainz, Johanna Elisabeth Heitmann: Scenarios of Application of Highly Generalized Geoinformation	96 - 105

Katja Kruschel, Peter Tainz: Concepts of Generalization of Pedestrian Route Information	106 - 118
David Řehoř, Pavel Slavík: Real-time Data Acquisition and Visualization Framework for Monitoring of Dynamic Systems	119 - 130
Andréa Corrêa Flôres Albuquerque, José Laurindo Campos dos Santos: Improving Textual Ontology Representation by Extending the Equivalent Programming Language for OSM	131 - 146
Dirk Burghardt, Matthias Bobzien, Ingo Petzold, Robert Weibel: Cartographic generalisation of large scale maps with <i>axpand</i>	147 - 159
Alistair Edwardes, Dirk Burghardt, Moritz Neun: Interoperability in Map Generalisation Research	160 - 174
Paul Hardy, Dan Lee: GIS-Based Generalization and Multiple Representation of Spatial Data	175 - 190
Horst Kremers: Generalization Principles in Applied Semiotics	191 - 204
Heiner Benking: Granularity, Topicality, and Generalization of Information	205 - 220
Arno Scharl: Patterns of Content Propagation in Electronic Environments	221 - 225
Torben Hansen, Peter Loos: Motive Elicitation for Model Improvement in IT Change Projects	227 - 243
